To Whom It May Concern,

It is with great pleasure that I write this letter to highly recommend Consolidated Construction Solutions, LLC. We had the opportunity to work with them in the construction of our first office location of 2,000 square feet. They made the whole process from concept to completion nearly effortless for us, and we are very satisfied with the results.

We were able to provide our own concepts and ideas for the design of the office, and they kept as much from the original design as possible, making the necessary adjustments to meet construction requirements and ADA guidelines. After we provided our original design concept, Consolidated Construction Solutions took care of the entire planning process which included buildout proposals, final design blueprints, electric plans and acquiring the necessary city permits before beginning construction.

Once that was completed, the construction process went smoothly and we were given the opportunity to choose interior paint colors, flooring designs, countertop and cabinet styles. We greatly appreciated that we were able to give our own input for how we wanted the office to look, and they were always very open and professional when receiving our feedback. They implemented any additional requests we had, such as the construction of rounded arches and the installation of upper kitchen cabinets. They managed to work efficiently and made us aware of any budget changes from any of our additional requests before implementing them.

We have now moved into our new office, and they have been very responsive and helpful whenever any minor fixes were needed. Overall, we are very satisfied with the construction results, we were impressed with their experience and construction quality, and we highly recommend Consolidated Construction Solutions for any construction project.

Best Regards,

Melanie Lombardi
